

Distribution liability: The data represents the results of data collection performed by a specific U.S. Army Corps of Engineers activity and includes the general existing conditions. As such, the user accepts the data as is and uses them with the express understanding that the U.S. Government makes no warranties, expressed or implied, regarding the accuracy of the data. The user assumes responsibility for the results of any use made of the data. The user is responsible for the results of any application of the data for other than its intended purpose.

Data Conventions: Hydrographic survey data is subject to change rapidly due to several factors including, but not limited to dredging activity and natural shoaling and scouring processes. The U.S. Army Corps of Engineers does not warrant the survey data to be current after the date of publication. The survey data is provided "as is" without warranty of any kind, either express or implied. The user agrees to indemnify the U.S. Government from all claims resulting from the use of the survey data. The user agrees to not resell the survey data to anyone else without also transferring this Disclaimer. The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to depict the general condition existing at that time.

DISCLAIMER: The U.S. Government furnishes these data and the recipient accepts and uses them with the express understanding that the U.S. Government makes no warranties, expressed or implied, regarding the accuracy of the data. The user assumes responsibility for the results of any use made of the data. The user is responsible for the results of any application of the data for other than its intended purpose.

MISSISSIPPI RIVER - B.R. TO GULF	
GRANADA RECON	
MR_10_GRA_20160429	
29 April 2016	

LEGEND	
— Federal Navigation Channel	○ Cable Area
— Federal Navigation Center Line	■ Placement Area
— As-built Pipeline/Cable	□ Anchorage Area
..... Unconfirmed Pipeline/Cable	★ Beacon, General
— Project Depth Contour	⊗ Obstruction Point
	◆ Red Navigation Buoy
	◆ Wrecks-Submerged
	◆ Green Navigation Buoy
	◆ Borrow Area
	● Shoalest Sounding**

**NOTES:**

Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NGVD). Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew. 2010 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (20 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
