NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Low Water Reference Plane 2007 (NGVD).
Distances on the Mississippi River, above and below Head of Passes are shown
at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard and USACE crew.
2010 Aerial Photography data source: NAIP, USDA-FSA-APFO Aerial Photography Field Office.

Reference is N.O.A.A. Navigation Chart No. 11370.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding
location and will include suspended solids, known as "fluff", if present. Low frequency (20 kHz)
survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom
material. Low frequency accuracies may vary depending on channel conditions and fathometer
settings.

MISSISSIPPI RIVER - B.R. TO GULF
ALHAMBRA RECON
MR_16_ALH_20161004
04 October 2016

US Army Corps
of Engineers
District: CEMVN

Distribution Notice: The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and includes the general existing conditions as such. The user assumes responsibility for the accuracy and use of the data. The user is responsible for the results of any application of the data for other than its intended purpose.

Data Content: Hydrographic survey data is subject to change due to several factors including but not limited to dredging activities and natural shoals and currents. The U.S. Army Corps of Engineers maintains current hydrographic survey data for the Mississippi River and its tributaries. This data is intended for U.S. Army Corps of Engineers use only. The information depicted on this map represents the results of a survey conducted on this date and can only be considered to represent the general condition existing at that time.
