

US Army Corps
of Engineers
District: CEMVN

DISTRIBUTION STATEMENT: The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and indicates the general existing conditions, such as, sea conditions, water levels, and currents. The user is responsible for the results of any application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change due to several factors including but not limited to dredging activities and natural shoaling and scouring processes. The U.S. Army Corps of Engineers does not warrant or guarantee the accuracy of the data. The surveyor is responsible for the results of any application of the data for other than its intended purpose.

Disclaimer: The data is intended for U.S. Army Corps of Engineers internal use only. The data is not to be distributed outside the U.S. Army Corps of Engineers without prior approval.

The information depicted on this map represents the results of a survey conducted on this date indicated and can only be considered to represent the general condition existing at that time.

DATA ACQUERED: The United States Government retains ownership of these data and the recipient accepts and uses them with the express understanding that the U.S. Government makes no warranties, expressed or implied, regarding the quality, performance, correctness, or reliability of the data furnished. The United States shall be sole responsible for any damage resulting from the use of the data furnished. The United States shall be sole responsible for any use under no liability whatsoever by any person to whom these data may be furnished to satisfy any claim made by any person against the United States for damages resulting from the use of these data to anyone other than the Government provided data. The recipient may not transfer the data to others without also sending this Disclaimer.

The information depicted on this map represents the results of a survey conducted on this date indicated and can only be considered to represent the general condition existing at that time.
