

NOTES:

Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW). 12'-16'. Datum Relationships for gage 01480 as of March 2020: 0.0' NAVD88, 2009.55 ± -0.53' MLLW = 2.97' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Distribution liability: The data represents the results of data collection/processing of a specific US Army Corps of Engineers activity and indicates the general existing conditions such as, but not limited to, the presence or absence of pipelines. The user is responsible for the results of any use of the data for other than its intended purpose.

Data Content: Hydrographic data is subject to change rapidly due to several factors including but not limited to dredging operations, subsidence, and changes in the hydrographical conditions which develop after the date of publication. This data is intended for Army Corps of Engineers internal use. Private names should not be used upon it.
