

**Distribution Liability:** The data represents the results of a collection/processing for a specific U.S. Army Corps of Engineers activity and indicates the general existing conditions. As such, it is only valid for its intended use, content, time and accuracy specifications. The user is responsible for the results of any of the application of the data for other than its intended purpose.

**Data Constraints:** Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging activity and natural shoaling and scouring processes. The U.S. Army Corps of Engineers accepts responsibility for changes in the hydrographic conditions which result after the date of collection. The user is responsible for the use of the data for internal use. Prudent mariners should not rely solely upon it.

**DISCLAIMER** The United States Government furnishes these data and the recipient accepts and uses them with the understanding that the US Government makes no warranties, expressed, or implied concerning the accuracy, completeness, reliability, usability or suitability for any particular purpose of the data. The recipient agrees that the data are provided without any liability whatsoever to any person by reason of any use made thereof. These data belong to the Government. Therefore the recipient fully agrees not to represent these data to anyone as other than Government provided data. The recipient may not transfer these data to others without also transferring this Disclaimer.

The information disclosed on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at that time.

MISSISSIPPI RIVER - B.R. TO GULF  
SOUTHWEST PASS - SHEET 2  
SW\_02\_SWPX\_20250313\_CS  
13 March 2025

Sheet  
Reference  
Number  
**2 of 13**

**NOTES:**

Horizontal Coordinate System:  
North American Datum of 1983 (NAD83), projected to the State Plane  
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:  
Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 12-16).  
Datum Relationships for gage 01480 as of March 2020:  
0.0' NAVD86, 2009.55 = -0.53' MLLW = 2.97' MCH

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are based on and provided by the U.S. Coast Guard.

2024 Aerial Photography data source: Optimal GEO (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

**\*\* Shoalest Sounding per Quarter per Reach.**

**\*\*\*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
