

Gage Reading: 1.0 MLLW @ VENICE (01480) @ 0930
 Sea Conditions: CALM, FLUFF
 Vessel Name: TOBIN
 Survey Type: CONDITION, SB
 Sounding Frequency***: LOW

Vertical Datum:
 Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW 12-16).
 Datum Relationships for gage 01480 as of March 2020:
 0.0' NAVD88, 2009.55 = -0.53' MLLW = 2.9' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.
 2022 Aerial Photography data source: Optimal GEO (1998 DOQQ in green)
 Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Distribution Liability: The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and should not be used for general navigation. As such, the United States Government makes no warranties, expressed or implied, regarding the reliability or suitability of the data furnished. The particular purpose of the information and the data furnished shall be understood to be limited to the needs of the surveying and mapping work for which it was collected. Any person who uses or makes use of the data does so at his/her own risk. The user agrees not to represent that the data or products derived therefrom are accurate or reliable without also understanding this Disclaimer.

Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including burial, erosion, to dredging, changes in water levels, and changes in the hydrographic conditions which develop after the date of survey. The data is intended for U.S. Army Corps of Engineers internal use. Public release should not be made until the Corps of Engineers has determined that the data is suitable for public use.
