

Gage Reading: 2.5 MLLW @ VENICE @ 0805  
 Sea Conditions: CHOPPY  
 Vessel Name: JOHN BOPP  
 Survey Type: CONDITION, SB  
 Sounding Frequency\*\*\*: SOUNDING\_FREQUENCY

0 500 1,000 1,500 2,000 2,500 Feet

**NOTES:**  
 Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Mean Lower Water (MLLW, 07-11). Datum Relationships for gage 01525 as of July 2015:  
 0.0' NAVD88 = -0.3' MLLW = 3.20' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

\*\* Shoalest Sounding per Quarter per Reach.

\*\*\* High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Sheet Reference Number  
3 of 13

Revision Number:  
3.12-20160811

US Army Corps of Engineers District: CEMVN

**DISCLAIMER**  
 Distribution liability: The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and includes the general existing condition. Such, activities, usage or interpretation of the data for other than its intended purpose, the user is responsible for the results of any application of the data to other than its intended purpose.  
**Data Constraints:** Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging, Army Corps of Engineers actions to improve navigation channels, changes in river bed material, and changes in the hydrographical conditions which develop after the date of publication. This data is intended for use by the Army Corps of Engineers and other Federal agencies as no guarantee is made to the general condition existing at the time of publication. The data is provided "as is" without warranty or guarantee of any kind. The user agrees not to represent these data as other than Government provided data. The user may not transfer these data onto another without also transferring this Disclaimer.
