Gage Reading: 1.7 MLLW @ PILOT TOWN @ 1055
 Sea Conditions: CALM, FLUFF
 Vessel Name: JOHN BOPP
 Survey Type: CONDITION, SB
 Sounding Frequency**: LOW

NOTES:
 Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.
 Vertical Datum: Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 07-11).
 Datum Relationships for gage 01525 as of July 2015:
 0.0' NAVD88 = -0.3' MLLW = 3.20' MLG
 Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.
 The location of navigation aids are base on and provided by the U.S. Coast Guard.
 2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)
 Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoalest Sounding per Quarter per Reach.
 *** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers District: CEMVN

DISTRIBUTION LIABILITY The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and/or contract. The general existing condition of such structures and/or areas is not implied by this data. Such structures and/or areas may have changed since the data was collected. The user is responsible for the results of any application of the data to other than its intended purpose.
DATA CONSTRAINTS Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging, Army Corps of Engineers actions to improve navigation, changes in hydrographical conditions which develop after the date of publication. This data is intended for use by the Army Corps of Engineers and its contractors as a reference for engineering purposes. The data is not to be considered permanent and is subject to change at any time.

DOCUMENTATION Associated constraints: The United States Corps of Engineers, understanding that the U.S. Government makes no warranties, express or implied, to the data and that the data is furnished solely for a particular purpose, shall not be liable for damages resulting from its use. The United States Corps of Engineers, any person, firm, or organization that receives this data, agrees to report to the U.S. Government prior to use of any data contained in this document. The recipient of this data may not transfer the data to others without also transferring this document. The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered b*best* when seen in the general condition existing at that time.
