Gage Reading: -1.00 MLLW @ PILOT TOWN @ 1115
Sea Conditions: CALM
Vessel Name: BLANCHARD
Survey Type: CONDITION, SB
Sounding Frequency*:** LOW

NOTES:
Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.
Vertical Datum: Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 07-11).
Datum Relationships for gage 01525 as of July 2015:
0.0' NAVD88 = -0.3' MLLW = 3.20' MLG
Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.
The location of navigation aids are base on and provided by the U.S. Coast Guard.
2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)
Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoal sounding per quarter per reach.
*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

Sheet Reference Number
4 of 13

Revision Number:
312-20160811

US Army Corps of Engineers District: CEMVN

Distribution Liability: The data represents the results of data collection/processing for a specific U.S. Army Corps of Engineers activity and/or product. The general existing condition of such activities and/or data is not guaranteed. Such activities and/or data are not necessarily suitable or accurate for any particular purpose. The user is responsible for the results of any application of the data to other than its intended purpose.
Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging operations, changes in river bed material, and changes in hydrographical conditions which develop after the date of publication. This data is intended for U.S. Army Corps of Engineers use. Other government agencies and/or organizations may have their own data which may be more current. The user is responsible for determining whether the data is suitable for a specific purpose.
The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered valid within the general conditions existing at the time.
