

Gage Reading: 2.4 MLLW @ PILOT TOWN @ 1035
 Sea Conditions: CALM
 Vessel Name: TECHE
 Survey Type: CONDITION, SB
 Sounding Frequency***: LOW

0 500 1,000 1,500 2,000 2,500 Feet

US Army Corps of Engineers District: CEMVN

Distribution liability: The data represents the results of data collection processing by a specific US Army Corps of Engineers activity and reflects the general existing conditions. Such data is not necessarily survey grade or suitable for engineering specifications. The user is responsible for the results of any application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging, navigation, and changes in the river bed. The Army Corps of Engineers does not warrant or guarantee the hydrographic conditions which develop after the date of publication. This data is intended for U.S. Army Corps of Engineers' internal use only and shall not be used open to the public.

MISSISSIPPI RIVER - B.R. TO GULF SOUTHWEST PASS - SHEET 4 SW_04_SWP_20200408_CS_PRO

08 April 2020

Sheet Reference Number

4 of 13

Revision Number: 4-01907022

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
