Distribution liability: The data represents the results of data collection processing by a specific US Army Corps of Engineers activity and reflects the general existing conditions. Such data is not necessarily survey grade or suitable for use in engineering specifications. The user is responsible for the results of any use of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging operations, changes in river bed material, and changes in the hydrographic conditions which develop after the date of publication. This data is intended for U. S. Army Corps of Engineers use only and is not to be used open to the public.
