

Gage Reading: 1.2 MLLW @ PILOT TOWN @ 0935  
 Sea Conditions: CHOPPY  
 Vessel Name: OB-173  
 Survey Type: CONDITION, SB  
 Sounding Frequency\*\*: LOW

**NOTES:**  
 Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.  
 Vertical Datum: Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW). 12'-16'.  
 Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW). 12'-16'.  
 Datum Relationships for gage 01525 as of March 2020:  
 0.0' NAVD88, 2009.55 = -0.53' MLLW = 2.97' MLG  
 Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.  
 The location of navigation aids are base on and provided by the U.S. Coast Guard.  
 2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)  
 Reference is N.O.A.A. Navigation Chart No. 11361.

\*\* Shoalest Sounding per Quarter per Reach.  
 \*\*\* High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

**Distribution Liability:** The data represents the results of data collection/processing for a specific US Army Corps of Engineers activity and/or product. The general existing condition of such activities and/or products is not guaranteed. Such activities and/or products are not necessarily suitable for any particular purpose. The user is responsible for the results of any application of the data to other than its intended purpose.  
**Data Constraints:** Hydrographic survey data is subject to change resulting in several factors including but not limited to dredging operations, changes in water levels, changes in riverbed material, changes in hydrographical conditions which develop after the date of publication. The data is intended for use by the Army Corps of Engineers as a reference to existing conditions. The data is not to be used as a definitive survey or for engineering purposes.  
 The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered valid for the general condition existing at that time.
