**NOTES:**

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 12-16). Datum Relationships for gage 01525 as of March 2020:
0.0' NAVD88, 2009.55 = -0.53' MLLW = 2.97' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers
District: CEMVN

Distribution Liability: The data represents the results of data collection and processing at a specific point in time and reflects activity and indicates the general existing conditions. As such, it is only valid for its intended use; content, time and accuracy requirements may not be adequate for any other purpose. The use of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change over time due to environmental processes such as shoaling, storm activity and natural shoaling and scouring processes. The U. S. Army Corps of Engineers makes no guarantee as to the accuracy of the hydrographical conditions which develop after the date of publication. This data is intended for U. S. Army Corps of Engineers' internal use. Forward reference should be strictly avoided.

DISCLAIMER
Access Constraints: The United States Government furnishes this map and the data contained therein. The user assumes all responsibility for the use thereof, and the United States shall be expressed, or implied concerning the accuracy, completeness, timeliness, or rights of use of information and the data furnished. The United States shall be under no liability whatsoever to any individual or party for any action taken in reliance upon the information or data furnished hereunder. These data belong to the Government. Therefore the recipient fully agrees not to represent these data to anyone as other than government data. The recipient also agrees to indemnify the Government for any damages that may result from the recipient's use of these data to others without also transferring this Disclaimer.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at that time.
