DISTRIBUTION LIABILITY: The data represents the results of data collection processing by a specific US Army Corps of Engineers activity and reflects the general existing conditions. Such data is not necessarily survey grade or suitable for engineering specifications. The user is responsible for the results of any use of this data for other than its intended purpose.

Data Constraints: Hydrographic surveying data is subject to change rapidly due to several factors including but not limited to dredging operations, changes in river bed material, and changes in hydrographical conditions which develop after the date of publication. This data is intended for U. S. Army Corps of Engineers use only and must be used within one year of the date of publication. The data is not intended for commercial use.

DISCLAIMER: The United States Government furnishes these data and the recipient accepts and uses them with the express understanding that the US Government makes no warranties, expressed or implied, concerning the data, its accuracy, reliability, or usability, or suitability for any particular purpose. The United States shall be liable only for damages resulting from the use of the data in conjunction with other data or information received from the government. The recipient shall be liable for any damages resulting from the use of the data in conjunction with other data or information received from the government. The recipient may transfer these data to anyone else than the government provided that the recipient also understands this Disclaimer. The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to be valid for the general condition existing at that time.
