Gage Reading: 1.7 MLLW @ PILOT TOWN @ 0940  
 Sea Conditions: CALM, FLUFF  
 Vessel Name: BEAUVAIS  
 Survey Type: CONDITION, SB  
 Sounding Frequency\*\*\*: LOW

0 500 1,000 1,500 2,000 2,500 Feet

**NOTES:**  
 Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 07-11). Datum Relationships for gage 01525 as of July 2015:  
 0.0' NAVD88 = -0.3' MLLW = 3.20' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

\*\* Shoalest Sounding per Quarter per Reach.

\*\*\* High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

**DISCLAIMER**  
 Access Constraints: The United States Government furnishes these data and its recipient agrees to use them with the express understanding that the U.S. Government makes no warranties, expressed or implied, concerning the general accuracy and usefulness of the data furnished. These particular purposes of the information and the data furnished. The United States shall be under no liability or responsibility to the user or to third parties in respect to any errors that may be contained in these data. In no event shall the United States be liable to the user or to third parties for damages resulting from use of these data including but not limited to direct, indirect, special or consequential damages. The user is responsible for any damages to property or人身 injury resulting from use of these data. The user agrees to indemnify the United States against any claims or damages arising out of the use of these data.  
 Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including burial, shifts in dredging activities, changes in riverbed materials, and changes in hydrographic conditions which develop after the date of publication. This data is intended for U.S. Army Corps of Engineers use. The data is not to be used for other purposes without the express written consent of the U.S. Army Corps of Engineers. The data is not to be used for other purposes without the express written consent of the U.S. Army Corps of Engineers.
