

Gage Reading: -1.70 MLLW @ PILOT TOWN @ 1140
Sea Conditions: CALM
Vessel Name: BLANCHARD
Survey Type: CONDITION, SB
Sounding Frequency*:** LOW

Scale: 0 500 1,000 1,500 2,000 2,500 Feet

NOTES:
 Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 07-11). Datum Relationships for gage 01525 as of July 2015:
 $0.0' NAVD88 = -0.3' MLLW = 3.20' MLG$

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoal sounding per quarter per reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

DISCLAIMER:
 Access Constraints: The United States Government furnishes these data and its recipient corps and uses them with the express understanding that the US Government makes no warranty, expressed or implied, concerning the general accuracy of the data, its reliability, or fitness for a particular purpose. The United States shall be under no liability for damages resulting from the use of any information contained in these data. The recipient corps and its users fully agrees not to represent these data to anyone as other than Government provided data. The recipient may not transfer these data on without also transferring this Disclaimer.
 The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered reliable in the general condition existing at the time it was made. The general condition of the waterway is subject to change rapidly due to several factors including burial, erosion, or dredging. Army Corps of Engineers assumes no responsibility for changes in the hydrographic conditions which develop after the date of publication. This data is intended for U.S. Army Corps of Engineers internal use. Public release of all or any part of this data is hereby denied.
