Gage Reading: 2.1 MLLW @ PILOT TOWN @ 0915
 Sea Conditions: CALM
 Vessel Name: BLANCHARD
 Survey Type: CONDITION, SB
 Sounding Frequency***: LOW

0 500 1,000 1,500 2,000 2,500
 Feet

NOTES:
 Horizontal Coordinate System:
 North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
 Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 07-11).
 Datum Relationships for gage 01525 as of July 2015:
 0.0' NAVD88 = -0.3' MLLW = 3.20' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoal sounding per quarter per reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers District: CEMVN

DISCLAIMER
 Access Constraints: The United States Government furnishes this data and the recipient corps and uses them with the express understanding that the US Government makes no warranties, expressed or implied, concerning the general existing condition of such, reliability, utility or suitability for any particular purpose of the information and the data furnished. The United States shall be under no obligation to furnish any further information or data to the recipient corps unless so required by reason of any change in the hydrographic survey data subject to change rapidly due to severe storms including but not limited to dredging operations, flooding, or other changes in the hydrographic conditions which develop after the date of publication. The data is intended for use by the Army Corps of Engineers as a reference for engineering purposes only.
 Data Constraints: Hydrographic survey data is subject to change rapidly due to severe storms including but not limited to dredging operations, flooding, or other changes in the hydrographic conditions which develop after the date of publication. The data is intended for use by the Army Corps of Engineers as a reference for engineering purposes only.
 The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered valid within the general conditions existing at the time.
