

DISCLAIMER: The data represents the results of a hydrographic survey conducted for a specific purpose. The data is only valid for its intended use, content, time and accuracy specifications. The user is responsible for the results of their use. Approximation of the data for other than its intended purpose. Data Constants: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging activities, sedimentation, and shifting sandbars. The user should verify the hydrographical conditions which develop after the date of the survey. The information depicted on this map represents the results of a hydrographic survey and is not to be considered as a representation of the general condition existing at that time.

Accession: The United States Government furnishes these data and the recipient accepts and uses them with the express understanding that the recipient is responsible for the accuracy, completeness, reliability, usability or suitability for any particular purpose of the information. The user is responsible for the results of their use. The user is under no liability whatsoever to any person by reason of any use of the information. These data belong to the Government. The user is not to disseminate these data to others without obtaining the approval of the Corps of Engineers. The user is not to be held responsible for any use of these data to others without obtaining the approval of the Corps of Engineers.

Gage Reading: 1.7 MLLW @ HEAD OF PASSES @ 0805
 Sea Conditions: CALM, FLUFF
 Vessel Name: TECHE
 Survey Type: CONDITION, SB
 Sounding Frequency***: LOW

NOTES:
 Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.
 Vertical Datum: Mean Lower Low Water (MLLW, 07-11).
 Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 07-11). Datum Relationships for gage 01545 as of July 2015: 0.0' NAVD88 = -0.18' MLLW = 3.32' MLG
 Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.
 The location of navigation aids are base on and provided by the U.S. Coast Guard.
 2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)
 Reference is N.O.A. Navigation Chart No. 11361.
 ** Shoalest Sounding per Quarter per Reach.
 *** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
