NOTES:
Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.
Datum Relationships for gage 01545 as of March 2020:
0.0' NAVD88, 2009.55 = -0.32' MLLW = 3.18' MLG
Distances on the Mississippi River, above and below Head of Passes are shown
at 1 mile intervals.
The location of navigation aids are base on and provided by the U.S. Coast Guard.
2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)
Reference is N.O.A.A. Navigation Chart No. 11361.
** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding
location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz)
survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom
material. Low frequency accuracies may vary depending on channel conditions and fathometer
settings.

DISCLAIMER
The data represents the results of data collection processes by the United States Government and does not represent the general existing conditions of the area. The data is intended for use by the U.S. Army Corps of Engineers and its contractors for specific engineering purposes only. The user is responsible for the results of any use of the data for other than its intended purpose.
Data Constraints: Hydrographic survey data is subject to change due to several factors including but not limited to dredging operations, subsidence, or changes in the hydrographical conditions which develop after the date of publication. The user is responsible for keeping the data current by re-surveying the area as soon as feasible. This data is intended for U.S. Army Corps of Engineers use only and must not be used for any other purpose.
