			■ -45' to -50'
			■ -50' to -55'
			■ -55' and below

DISCLAIMER
 The United States Government furnishes these data and the recipient accepts and uses them with the express understanding that the data are not to be used for any purpose other than that for which they were originally prepared, and that the user is responsible for the results and accuracy of any application of the data for other than the intended purpose.

Accession/Processing: The data represents the results of a collection/processing for a specific US Army Corps of Engineers project. The data is only valid for its intended use, content, time and accuracy specifications. The user is responsible for the results and accuracy of any application of the data for other than the intended purpose.

Data Constants: Hydrographic survey data is subject to change frequently due to several factors including but not limited to dredging, sedimentation, and other channel changes. The user is responsible for the hydrographical conditions which develop after the date of the survey. The information depicted on the map represents the results of a survey and is not to be considered a representation of the general condition existing at that time.
