Gage Reading:	0.5 MLLW @ HEAD OF PASSES @ 1120
Sea Conditions:	CALM
Vessel Name:	BLANCHARD
Survey Type:	CONDITION, SB
Sounding Frequency***:	LOW

Feet
0 500 1,000 1,500 2,000 2,500

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 12-16).
Datum Relationships for gage 01545 as of March 2020:
0.0' NAVD88, 2009.55 = -0.32' MLLW = 3.18' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2022 Aerial Photography data source: Optimal GEO (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

District: CEMVN

DISCLAIMER

Access Constraints: The United States Government furnishes this map "as is" and makes no warranty, express or implied, concerning the accuracy, completeness, reliability, or suitability for any particular purpose of the information and the data furnished. The United States shall be under no liability whatsoever to any individual or party for any loss or damage resulting from the inaccuracy or incompleteness thereof. These data belong to the Government. Therefore the recipient fully agrees not to represent these data to anyone as other than Government data. The recipient also agrees to indemnify these data to others without also transferring this Disclaimer.

Distribution Liability: The data represents the results of data collection and analysis performed on dynamic processes activity and indicates the general existing conditions. As such, it is only valid for its intended use; content, time and accuracy of the data may not be valid for uses other than its intended purpose. The U. S. Government shall be under no liability whatsoever to any individual or party for any loss or damage resulting from the inaccuracy or incompleteness of any of the application of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data is subject to change activity and natural shoaling and scouring processes. The U. S. Government shall be under no liability whatsoever to any individual or party for any loss or damage resulting from the inaccuracy or incompleteness of any of the application of the data for other than its intended purpose. The data is intended for U. S. Army Corps of Engineers' in the hydrographical conditions which develop after the date of publication. This data is intended for U. S. Army Corps of Engineers' purposes. Toward this end the data is deemed adequate and fully suitable.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general condition existing at that time.
