

US Army Corps of Engineers  
District: CEMVN

Distribution Liability: The data represents the results of data collection/processing of a specific set of data and includes the general existing conditions at such activity and includes the data collected and used by the United States Government makes no warranty, expressed or implied, concerning the accuracy, reliability, or completeness of any of the data. The user is responsible for the results of any use of the data for other than its intended purpose.

Data Constraints: Hydrographic survey data including but not limited to dredging data due to several factors including but not limited to changes in hydrographical conditions which develop after the date of publication. The data is intended for U.S. Army Corps of Engineers internal use. Product names shown do not imply agency use.

Disclaimer: Access Constraints: The United States Government furnishes these data and the recipient accepts and uses them with the express understanding that the U.S. Government makes no warranty, expressed or implied, concerning the accuracy, reliability, or suitability of such data for a particular purpose. The United States shall be under no liability for damages resulting from the use of the data. Any person using this data is advised to consult with the U.S. Army Corps of Engineers to determine if further surveying is required. The U.S. Army Corps of Engineers does not warrant that the data provided is current or accurate. The recipient may not transfer this data to other government agencies without consulting the U.S. Army Corps of Engineers.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered as being current for the period of time during which the survey was conducted.

This map is not to be used for navigation purposes. The information is provided "as is" and the U.S. Army Corps of Engineers makes no warranties, expressed or implied, concerning the accuracy, reliability, or completeness of the data.

Gage Reading: 2.1 MLLW @ HEAD OF PASSES @ 1200  
Sea Conditions: CALM  
Vessel Name: TECHE  
Survey Type: CONDITION, SB  
Sounding Frequency\*\*\*: LOW

Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.  
Datum Relationships for gage 01545 as of July 2015:  
0.0' NAVD88 = -0.18' MLLW = 3.32' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.  
The location of navigation aids are base on and provided by the U.S. Coast Guard.  
2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)  
Reference is N.O.A.A. Navigation Chart No. 11361.  
\*\* Shoalest Sounding per Quarter of Reach.  
\*\*\* High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.
