

NOTES:
 Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.
 Gage Reading: 0.5 MLLW @ HEAD OF PASSES @ 0840
 Sea Conditions: CHOPPY
 Vessel Name: BLANCHARD
 Survey Type: CONDITION, SB
 Sounding Frequency***: LOW

Vertical Datum: Soundings are in feet and indicate depths below Mean Lower Low Water (MLLW, 12-16).
 Datum Relationships for gage 01545 as of March 2020:
 0.0' NAVD88, 2009.55 = -0.32' MLLW = 3.18' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.

2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

** Shoalest Sounding per Quarter per Reach.

*** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

US Army Corps of Engineers District: CEMVN

DISCLAIMER
 The data represents the results of data collection processing by a specific Army Corps of Engineers activity and reflects the general existing conditions. Such data is not necessarily survey grade or suitable for use in engineering applications without further processing. The user is responsible for the results of any application of the data for other than its intended purpose.

CONSTRAINTS
 Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging operations, riverbank erosion, subsidence, and changes in the hydrographical conditions which develop after the date of publication. This data is intended for U.S. Army Corps of Engineers users to consider when developing their own maps or reports. The user is responsible for the results of any application of the data for other than its intended purpose.
