115-116

Coordinate System:
NAD83 (North American Datum of 1983), projected to the State Plane
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

: shown in feet and indicate depths below Mean Lower Low Water (MLLW, 12-1

Relationships for gage 01545 as of March 2020:
2009.55 = -0.32' MLLW = 3.18' MLG

All navigation aids are base on and provided by the U.S. Coast Guard.

Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ imagery).
LOA A Navigation Chart No. 11361

Bunding per Quarter per Reach

ency (200 kHz) survey data represents the first signal return at a sounding

they (200 kHz) survey data represents the first signal return at a sounding. It will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) normally penetrates through this "fluff" layer to depict elevations of consolidated bedrock. Frequency accuracies may vary depending on channel conditions and fathometer settings.

For more information about the study, please contact Dr. John Smith at (555) 123-4567 or email jsmith@researchinstitute.org.
