Gage Reading: 2.9 MLLW @ LIGHT-14 @ 0930
 Sea Conditions: CALM
 Vessel Name: BEAUVAIS
 Survey Type: CONDITION, SB
 Sounding Frequency***: LOW

Feet
 0 500 1,000 1,500 2,000 2,500

NOTES:
 Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.
 Vertical Datum: Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 07-11). Datum Relationships for gage 01625 as of July 2015: 0.0' NAVD88 = 0.39' MLLW = 3.89' MLG
 Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.
 The location of navigation aids are base on and provided by the U.S. Coast Guard.
 2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)
 Reference is N.O.A. Navigation Chart No. 11361.
 ** Shoalest Sounding per Quarter per Reach.
 *** High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

DISCLAIMER:
 The United States Government furnishes these data and the recipient accepts and uses them with the express understanding that the data are not to be used for any purpose other than that for which they were prepared, or implied concerning the accuracy, completeness, reliability, usability or suitability for any particular purpose of the recipient. The user is responsible for the results and accuracy of any data used. The United States Government makes no warranty, expressed or implied, under any liability whatsoever to any person by reason of any use of the data. These data are being made available to the recipient under a license from the Government provided data. The recipient may not transfer these data to others without also transferring the Disclaimer.
 The information depicted on the map represents the results of a survey conducted on or about the date shown. It is not to be considered a representation of the general condition existing at that time.
 Distribution Liability: The data represents the results of data collection/processing for a specific US Army Corps of Engineers project. It is only valid for its intended use, content, time and accuracy specifications. The user is responsible for the results and accuracy of any data used. The United States Government makes no warranty, expressed or implied, under any liability whatsoever to any person by reason of any use of the data. These data are being made available to the recipient under a license from the Government provided data. The recipient may not transfer these data to others without also transferring the Disclaimer.
 Data Constants: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging, spoil accumulation, and channel migration. The user is responsible for the accuracy of the data for their intended purpose. The user is responsible for the results and accuracy of any data used. The United States Government makes no warranty, expressed or implied, under any liability whatsoever to any person by reason of any use of the data. These data are being made available to the recipient under a license from the Government provided data. The recipient may not transfer these data to others without also transferring the Disclaimer.
 The information depicted on the map represents the results of a survey conducted on or about the date shown. It is not to be considered a representation of the general condition existing at that time.
