

**NOTES:**  
Horizontal Coordinate System: North American Datum of 1983 (NAD83), projected to the State Plane Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.

Vertical Datum: Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW, 07-11).  
Datum Relationships for gage 01625 as of July 2015:  
0.0' NAVD88 = 0.39' MLLW = 3.89' MLG

Distances on the Mississippi River, above and below Head of Passes are shown at 1 mile intervals.

The location of navigation aids are base on and provided by the U.S. Coast Guard.  
2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)

Reference is N.O.A.A. Navigation Chart No. 11361.

\*\* Shoalest Sounding per Quarter per Reach.

\*\*\* High frequency (200 kHz) survey data represents the first signal return at a sounding location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz) survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom material. Low frequency accuracies may vary depending on channel conditions and fathometer settings.

These constraints: The United States Government furnishes these constraints to the recipient accept and uses them with the express understanding that the US Government makes no warranties, expressed or implied, concerning the reliability, accuracy, or usefulness of the data for any particular purpose. The United States shall be under no obligation to furnish further data or services to anyone who receives this data, nor does it guarantee its accuracy or reliability. The user is responsible for the results of any application of the data for other than its intended purpose.  
Data Constraints: Hydrographic survey data is subject to change rapidly due to several factors including but not limited to dredging operations, subsidence, and changes in the river bed. The Army Corps of Engineers does not guarantee the date of publication. This data is intended for the Army Corps of Engineers and is not to be used for any other purpose. The hydrographic conditions which develop after the date of publication, this data is not guaranteed to be accurate at that time. The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to be current on the date of condition existing at that time.
