

<u>LEGEND</u>	
— Federal Navigation Channel	○ Cable Area
— Federal Navigation Center Line	■ Placement Area
— As-built Pipeline/Cable	□ Anchorage Area
..... Unconfirmed Pipeline/Cable	⊗ Obstruction Point
— Project Depth Contour	♂ Wrecks-Submerged
	■ Shoalest Sounding**
	★ Beacon, General
	◆ Red Navigation Buoy
	◆ Green Navigation Buoy
	— Borrow Area

**NOTES:**  
Horizontal Coordinate System:  
North American Datum of 1983 (NAD83), projected to the State Plane  
Coordinate System (SPCS), Louisiana South Zone. Distance units in U.S. Survey Feet.  
Vertical Datum:  
Soundings are shown in feet and indicate depths below Mean Lower Low Water (MLLW). 12'-16'.  
Datum Relationships for gage 01625 as of March 2020:  
0.0' NAVD88, 2009.55 ± 0.40' MLLW = 3.90' MLG  
Distances on the Mississippi River, above and below Head of Passes are shown  
at 1 mile intervals.  
The location of navigation aids are base on and provided by the U.S. Coast Guard.  
2016 Aerial Photography data source: Precision Aerial Reconnaissance, LLC (1998 DOQQ in green)  
Reference is N.O.A.A. Navigation Chart No. 11361.  
\*\* Shoalest Sounding per Quarter per Reach.

\*\*\* High frequency (200 kHz) survey data represents the first signal return at a sounding  
location and will include suspended solids, known as "fluff", if present. Low frequency (24 kHz)  
survey data normally penetrates through this "fluff" layer to depict elevations of consolidated bottom  
material. Low frequency accuracies may vary depending on channel conditions and fathometer  
settings.

District: CEMVN

Distribution liability: The data represents the results of data collection processing by a specific US Army Corps of Engineers activity and includes the general existing conditions. Such data is not necessarily survey grade or suitable for any particular purpose. The user is responsible for the results of any use of the data for other than its intended purpose.  
Data Constraints: Hydrographic data is subject to change rapidly due to several factors including but not limited to dredging operations, changes in river bed material, and changes in the hydrographic conditions which develop after the date of publication. The user is advised to use the most recent data available. The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general existing conditions at that time.
